Let food be thy medicine homemade,
and medicine be thy food.

Hippocrates of Kos (460 to 377 BC.),
Greek physician, » The father of medicine«

ENJOY YOUR MEAL!

Enjoy food as nature intended.

We believe that a balanced, wholesome and enjoyable diet involves sourcing food high in quality, taste and nutrition, and assembling it thoughtfully.

Preparation is key. Experimenting with new ingredients and methods; cooking and baking with passion - these things add even more flavor. Celebrating a sense of culture and special occasions elevates meal times all the more.

We encourage you to use our mills as a means of enjoying and immersing yourself in the age old rituals of food preparation. Appreciate the abundance and diversity that wholesome food can bring; share meals and explore the experience with your loved ones.

After all, there's quite simply nothing like the aroma of homemade fresh bread wafting from your own "bakery"!

Komu

MILLS. FLAKERS. BLENDERS.

Make it fresh,
be komo!

Why grind flour? Yes, it saves you money. But nothing compares to flour that's been freshly milled – it's aromatic and bursting with wholesome nutrients! What's more, on a practical note, whole grain stores well – something the ancient Egyptians knew, and used to their advantage. They used mills as an efficient and quick means of accessing the nutritional values of grains, much as today we use a can opener for the convenience that canned food offers. Did you know that while industrially produced flours are repeatedly sifted, freshly ground flour contains

the entire grain body, including the valuable shell? Furthermore, freshly milled flour has a unique aroma, owing to the essential oils and the nutrients that are allowed to unfold naturally through milling. Unsurprisingly, these oils add a further dimension to the taste, in the same way that freshly finest ground coffee has more depth to it than instant coffee.

Everything speaks for its own...

With our mills, you can finely grind all cereals, legumes and spices as well as small, non-oily seeds and even coffee beans. The core nutrients and dietary fibers of whole grains such as magnesium, iron, B vitamins and valuable vegetable proteins remain. Why not give your body what it craves – food that's as close to its natural state as possible. Once you taste the difference, there's no going back!

We know what we're talking about.

We've been designing and producing mills for more than 30 years. Our passion and know-how drives the development of our mills – and there's one thing we're certain of: our mills deliver. We're so convinced of the quality of our mills, each one comes with a **12 year warranty.**

When it comes to designing our mill casings, we follow the motto: **"Avoid all that is superfluous. Design simply, according to the product needs."** As much as possible, we use the local resources available to us in production of our mills.

We are proud to have developed a long standing partnership with our partners.

Our devices are manufactured with a lot of love, according to the high requirements of all testing authorities. We check each mill by hand before it leaves our factory. And we are dedicated

to continually seeking new ways of developing and improving our products.

In short, our range of mills

- are simple to operate
- are easy to clean
- are compact for small kitchens, but also
- are large enough for families and professionals
- are soothingly quiet
- use a gentle but efficient grinding technique
- offer exact yet easily adjustable grinding options
- are developed sustainably at every point in the production chain.

At the heart of each of our mills is the unique **KoMo grinder**. Our grinders are much more than just stones and an engine, and our grinder technology is patented accordingly.

What makes KoMo mills different? Rugged materials, carefully positioned, ensure a smooth grinding interaction. A spring placed between the grinding stones blocks excessive noise from the grinding process. This way, both the stones and your nerves, are spared.

Our grinding stones are made from **corundum ceramics**, a composite we discovered in 1985. The corundum ceramic stones allow for an effective but gentle grinding technique. They require a low energy input and don't need to be sharpened. They offer grinding options from coarse to super fine, are indestructible and resilient. The high quality of our industrial motors is additionally confirmed by a seal from TÜV SÜD in Munich.

Our **industrial motors** are installed with nonwearing parts. Therefore, they are maintenancefree and environmentally friendly. They run and run and run - for decades, problem free.

The ability to **select the precise flour texture** you desire is another feature of our mills. Simply rotate the funnel along the scale to adjust flour texture.

Our mill housings, crafted from high-quality wood, are oiled so they can be cleaned with fine sandpaper (even after years of use) and with an application of oil, can once again look like new.

Timelessly beautiful and robust: the KoMo cabinet.

Hard shell, hard core.

We pay just as much attention to the exterior of our mills as the interior. Stability and durability are important both for our grinding technology and the housing. We use high quality, local wood – the perfect home for our mills.

Our handcrafted, well-engineered casings are durable and look good. All cabinets are pretreated with organic vegetable oils; we recommend KoMo mill owners maintain this treatment.

EASY TO USE...

We believe that mills should give you all possible grinding options: from coarse to super fine, and everywhere in between. The mill should allow you a look inside to check the grinding stones. And importantly, the mill should operate as simply as possible.

With KoMo mills, you can rotate the hopper along its scale to select the degree of grinding you desire, from "very coarse" to "very fine". If you find that the stones start to wear down – this can happen after many years of use – simply turn the funnel slightly further in the direction "fine"; no other adjustment is necessary.

Our mills open easily without tools: simply turn the hopper approximately two turns in the coarse direction to gain access to the grinder.

To ensure a consistent high quality across all our products, we manufacture all our mills exclusively in Austria, where they are hand assembled, checked over by hand and a gluten-free test milling is carried out before shipping.

Living by these standards forms the basis of our daily activities at KoMo. Quality is core to our company philosophy, and our mills are built with a passion that blends engineering with nature, and our gratitude with our passion. It is our hope that each mill transports a piece of our philosophy into your kitchen, and that your KoMo mill offers you a new way of enjoying food and good health!

All that's left for us to say:

ENJOY YOUR MEAL!

Marcel und Peter Koidl

RAW FOODS OVERVIEW

With these **six symbols** you can quickly identify which food types can be processed with which mill. Raw foods are listed alongside the grinding material group:

SOFT GRAINS
Wheat, spelt, rye...

HARD GRAINS
Wheat, corn, rice, millet...

OIL SEEDS (with a flaker only)
Oats, poppy seeds, flax seeds...

SPICES
Pepper, chilli peppers, mustard seeds...

LEGUMES
Chick peas, beans, peas...

COFFEE BEANS
All varieties of roasted beans.

Basically, you can use the mills to grind any food, as long as it isn't oily, fatty or wet.

WHICH DEVICE FITS?

What do you want to process? With the help of this table you can quickly find out which machine will process which product. If your product is not listed here, please contact us directly or check our YouTube channel (komobio). We are constantly expanding this list. You will find our contact details on the last page.

HAND FLAKER

FLOCINO

The FLOCINO uses the same revolutionary design and engineering as the FLICFLOC, but with an adjustable roller gap, allowing for precision flaking. The flaker's sturdy solid beech wood base can be securely attached to your table or worktop with its accompanying clamps. Its white plastic hopper can hold a generous portion of more than 9 oz of oats. Thanks to its clever rolling system, the FLOCINO requires a short cranking radius of just over 6". A great addition to your kitchen for the whole family.

FOR HOUSEHOLDS OF 1 – 5 PEOPLE

HAND FLAKER

FLICFLOC

Housed in furniture grade beech plywood, the FLICFLOC can be secured to your table or work surface with its accompanying clamp. All you need to do is fill the hopper with oat groats, and start cranking for fast action flaking! Best of all, turning the crank is quite simply child's play – not to mention a great way of getting the kids involved in healthy eating habits! The FLICFLOC is a practical and compact option - standing at just 7.28 inches tall, it won't take up much space in your cupboard or on your worktop. The glass container is also included, as pictured.

HAND MILL WITH SEPERATE ELECTRIC

FLOCMAN

Flaking really doesn't get any easier than this. Our popular electric flaker, the FLOCMAN, delivers 90 g (3.53 oz) of grain flakes a minute, with barely a peep. Suitable for all types of soft grain, the FLOCMAN can also crush oil seeds and spices. The crushing unit is housed in solid beech wood. Cleaning the mill is easy and no additional tools are required. The FLOCMAN comes with a beautifully designed, handmade ceramic bowl, as pictured.

INFINITELY VARIABLE

FOR HOUSEHOLDS OF 1 - 2 PEOPLE

ELECTRIC FLAKER 140 WATT

HAND MILL

Our neat and sturdy Hand Grinder gives you the visual satisfaction of watching your grain grind into fine flour, thanks to its transparent milling chamber. Equipped with our corundum ceramic millstones, the Hand Grinder offers endless baking opportunities with the multiple flours it can produce! Its extra large handle and specially shaped millstones provide smooth cranking. Made of beautiful solid maple hardwood and stainless steel, the Hand Grinder can be fastened to your countertop with the two clamps provided, making it ultra stable.

ELECTRIC DRIVE

We've developed a quiet electronic Motor Drive attachment for the Hand Grinder – the effortless option!

WORLD NOVELTY!

KOMOMIO ECO 250 WATT

KOMOMIO ECO

The latest innovation from our company, the first grain mill in the world with a funnel made of cork. Cork is one of the most sustainable materials in the world, 100% biodegradable and can therefore also be recycled without waste. In addition, our new KoMoMio ECO is equipped with an energy-efficient 250 watt motor so that you can produce your own grain even more environmentally friendly - because our resources are important.

FOR HOUSEHOLDS OF 1 - 2 PEOPLE

GRAIN MILLS 250 WATT

FIDIBUS 21

Although just 324 mm (13.03 in) high, this mini powerhouse performs in the same league as our larger mills. Housed inside the FIDIBUS 21's beautiful beech plywood sits a 250-watt industrial strength motor, and a self-sharpening corundum-ceramic grinding mill capable of grinding 100 g (3.53 oz) fine flour a minute. Whether wheat, rye, spelt, or barley, the hopper holds 850 g (29.98 oz) of grain - enough to make more than 1 kg (2.20 lb) of whole grain bread. The grind texture can be adjusted by simply turning the hopper bowl to align its index with the graphic scale on the front of the mill. Accessing the milling chamber is quick and easy - no tools required - and cleanup is minimal.

GRAIN MILLS 250 WATT

MAGIC

The MAGIC is equipped with an industrial strength motor and precisely fitted corundum ceramic millstones – the same grinding mechanism behind the FIDIBUS 21 – and is housed in natural wood and stainless steel. The MAGIC grinds soft and hard wheats, lentils, many dry beans and dried, non-oily spices. With the MAGIC, you're in control - grind to the texture of your choosing, from fine flour to coarse meal or cracked grain: the grind texture is readily adjustable by simply turning the hopper bowl. Ideal for those who prefer a steely aesthetic.

FOR HOUSEHOLDS OF 1 – 2 PEOPLE

GRAIN MILLS 360 WATT

FIDIBUS CLASSIC

The FIDIBUS CLASSIC is our most popular mill, and for good reason. Its revolutionary milling unit, composed of self-sharpening millstones made from corundum-ceramic and a powerful 360-watt motor, is housed in a beautiful native beech casing, featuring classic box joinery. It grinds 100 g (3.53 oz) of fine flour a minute effortlessly, and with minimal noise.

A simple twist of the hopper takes you from coarse grind for breads, to fine grind for cakes. It's the ideal family grain mill – let the FIDIBUS CLASSIC take a place of honor in your kitchen!

FOR HOUSEHOLDS OF 3 – 5 PEOPLE

	TECHNICAL SPECIFICATIONS*	Power Electric Motor (Watt)	Milling rate for finely ground wheat in g (oz) per min. GRAIN MILLS 360 WATT

FIDIBUS MEDIUM

The FIDIBUS MEDIUM combines the style of our much loved FIDIBUS 21 with the power of our flagship model, the FIDIBUS CLASSIC. For the FIDIBUS MEDIUM, we slightly elongated the housing of the FIDIBUS 21 to accommodate a stronger, 360 watt motor and larger millstones. The result? A compact package that is kind to your wallet, and ideal for families: the FIDIBUS MEDIUM is very popular with households of 3-5 people.

PK 1

While technically identical to the FIDIBUS CLASSIC with its large 3.35 inch diameter, self sharpening corundumceramic grinder and efficient 360 watt motor, the PK 1 is instead housed in a beautiful hexagonal cabinet of solid beech wood. It's so easy to use: the grind texture can be adjusted by simply turning the hopper bowl. As with all KoMo mills, accessing the milling chamber is quick and easy – no tools required – and cleanup is minimal.

FOR HOUSEHOLDS OF 3 – 5 PEOPLE

GRAIN MILLS 360 WATT

KOMOMIO

With the KoMoMio grain mills become really colorful. With no less than 6 colors, our powerful grain mill not only provides color in your kitchen, but above all freshly ground grain every day. That means significantly more nutrients and a better taste. With its powerful motor, the KoMoMio is a perfect companion for beginners AND baking professionals. Innovative are not only the trendy colors, but also the combination of wood and an innovative recycled material, which replaces the plastic on the housing. A cool combination of proven and lots of innovation.

Available in 6 trendy colors: **BLUE, GREEN, BLACK, RED, YELLOW, NATURE**

COMBO UNITS 360 WATT

DUETT 100

The DUETT 100 delivers freshly ground flour and flaked grains, thanks to its two motors, the robust grain mill of the FIDIBUS CLASSIC and the efficient flaking rollers of the FLOCMAN. Its beautiful cabinet, constructed of solid beech wood and furniture grade beech veneer, contains the motors separately, allowing you to grind and flake at the same time. That means you can start the day with delicious fresh flakes for oatmeal, make fine flour at midday for an afternoon cake, and prepare crushed poppy seeds as a topping for both! Also included is a handmade ceramic bowl for the flaker unit, finished with foodsafe glazing.

FOR HOUSEHOLDS OF 3 - 5 PEOPLE

* Please note that to use the hand flocker, the device must be placed on the edge of a table or on the grain drawer (see accessories page 37).

COMBO UNITS 600 WATT

DUETT 200

The Duett 200 gives you a great full scale variety – so you can prepare fresh flakes for muesli or overnight oats, fine flour for a tasty loaf, and ground coffee beans for a fresh aromatic refreshment! This is made possible courtesy of the same technology belonging to the FLOCMAN and the FIDIBUS XL. Also included with the DUETT 200 is a specially designed, handmade ceramic bowl for the flaker unit. If you want a full range of capabilities, with serious power, the DUETT 200 offers significant savings compared to buying a mill and flaker separately.

FOR HOUSHOLDS OF 5 AND MORE PEOPLE

GRAIN MILLS 600 WATT

FIDIBUS XL

With it's powerful 600 watt motor and a hopper holding over 1200 g of grain, the FIDIBUS XL produces fine flour at twice the speed of our smaller Fidibus models. A mere 7 minutes of grinding produces enough fine flour for two large loaves of bread! If you are looking for an option that can take on all dry grains - hard and soft, as well as spices, coffee beans and lentils, plus offer lasting performance and extended heavy use, the FIDIBUS XL is your mill. It's the clear choice for large-scale kitchens and whole grain enthusiasts.

GRAIN MILLS FOR PROFESSIONALS

FIDIBUS XL Plus

The FIDIBUS XL Plus' powerful millstones and high strength 600-watt motor means the mill can produce 200 g of flour a minute - at the fine setting. This allows the XL Plus to be operated non-stop for extended periods - indeed for hours at a time. And because the XL Plus can run continuously, you can simply keep refilling its hopper and continue grinding for whatever quantity of flour you need. All of this makes the FIDIBUS XL PLUS the ideal mill for all workshops, large kitchens, families, community centers and kindergartens... a reliable partner for everyday life.

GRAIN MILLS FOR PROFESSIONALS

JUMBO

The JUMBO processes all kinds of grains and even corn into fine flour. Equipped with extra large grinding stones of corundum ceramics, the JUMBO is designed for commercial use in bakeries and natural food stores. Its solid housing and large lever allow for continuous grinding adjustment - allowing you to mill from fine flour to coarse meal. At its finest setting, the Jumbo can produce 350 g of flour per minute. Use of a bag with the dust preventative collar holder ensures that all the flour will end up in the bag with no waste. The grain hopper is accessible from the hinged door on top.

BLENDER 1400 WATT

KOMOMIX+

We proudly present our KoMoMix+. It was developed in Austria and the focus for us was to deliver a perfect performance and design it with nice shape. The casing is made of Austrian beech wood. This is not only good for the environment but also keeps the noise level down. The motor drive is designed without compromise, it features a 1400 W motor and reaches more than 30,000 rpm. Therefore it guarantees a long lifecycle and a lot of pleasure at using. With its 8 blades, it cuts and crushes nearly everything and detaches the most important parts of the ingredients.

FOR HOUSEHOLDS OF 1 AND MORE PEOPLE

AVAILABLE IN 6 COLORS

Key data:

- 30,000 rpm
- 1,400 watt motor
- 1.7 l BPA-free tritan pitcher
- removable eight-blade cutting assembly for easy cleaning
- stirrer included
- housing made of solid beech wood
- simple operation by one-touch-button with integrated pulse function
- for the easy and fast making of smoothies, ice cream, spreads, nut puree, marinade and more
- to shred coffee beans, nuts or grain
- made environmentally friendly and fair in Austria

The KoMoMix+ is available in 6 trendy colors. For sure you will find the right one to fit your personal taste and your kitchen. You can choose of:

BLACK • BLUE • CREAM • GREEN • RED • YELLOW

FREQUENTLY ASKED QUESTIONS

VALUE THAT EXCEEDS THE COST?

Our devices are manufactured exclusively in Austria and with great attention to detail. This means fair wages and sustainable jobs. Each product is thoroughly tested before delivery and finally, by means of electronic entry of the serial number, precisely documented. We make no compromises when it comes to the materials used. Thus, we only use high-quality, durable and environmentally friendly materials. In order to avoid long, environmentally damaging transport routes, we rely on regional suppliers - even if they are somewhat more expensive. This extends to sustainable packaging made of recycled cardboard and without plastic. In addition, all our industrial motors receive a certificate from TÜV SÜD in Munich and the wood used for our devices is PEFC certified - so we guarantee sustainable, regional forestry.

WHAT MAKES THE STONES IN A KOMO MILL OF SUCH HIGH QUALITY?

Ceramics and high-grade corundum are two of the hardest raw materials in the world and are therefore virtually indestructible. Our stones, manufactured by experts, are also self-sharpening and thus virtually wear-free.

WHAT HAPPENS IF I GRIND INGREDIENTS THAT ARE WRONG, TOO MOIST OR TOO OILY?

Thanks to our sophisticated technology, in most cases nothing is broken but the millstones only slightly contaminated.

HOW CAN I CLEAN MY GRINDING STONES?

- Fineness adjustment by turning the funnel to coarse
- Empty hopper by switching on
- Fill in and grind about 2 handfuls of long grain white rice
- Repeat this treatment in case of heavy soiling

 On our Youtube channel (komobio) you will also find a corresponding video. With normal use it is not necessary to clean the stones.

CAN MY MILL BE DAMAGED FROM OVERHEATING?

No, all KoMo devices are equipped with overheating protection. This is not triggered by normal household quantities. Should it be triggered nevertheless, please switch off the mill, disconnect it from power and allow it to cool down for twice as long as it has been used.

DO MY FLAKES COME INTO CONTACT WITH PLASTIC?

Our flake crushers and combination units all have nickel-free stainless steel rollers. Your flakes only come into contact with food grade BPA-free plastic at the hopper of the Flocino, which you need not have any concerns about.

DO I GET SPARE PARTS?

Don't worry, we have been around for over 35 years and we plan to continue manufacturing our equipment for at least another 35 years. We are always trying to repair even our oldest devices, so that you do not have to dispose of your machine and do not pollute the environment.

HOW CAN I DETERMINE WHETHER A CERTAIN VARIETY OF SPICES OR OTHER GROUND MATERIAL CAN BE GROUND IN MY FLOUR MILL?

Please refer to our grinding material overview on page 11 and we have also provided important information on our homepage on the subject of 'What can I grind or flake'.

HOW DO I SEE THAT THE MILLSTONES IN THE MILL ARE WORN?

As soon as the flour is no longer fine enough, this is an indication that the millstones are at the end of their life. However, this is usually only the case after more than 20 years, because our patterned stones sharpen themselves.

WHAT IF I HAVE A GLUTEN INTOLERANCE? HAS MY MILL BE TESTED WITH GLUTEN-CONTAINING GRAIN?

No worries. If you tell us when you place your order that you would like to have the grain mill of your choice gluten-free ground, we will of course be happy to do this free of charge. KoMo mills sold in the USA are not tested with gluten-containing grain.

ACCESSORIES

FLOUR SIFTER

Our Flour Sifter allows you to separate coarse bran from whole grain flour, leaving a very fine flour that's ideal for making pastries, cakes, and cookies, and a bran that can be used for breads, smoothies, soups and granola. A plexiglass funnel protects the sifter and flour. Sieve inserts are interchangeable, and are available in medium, fine and extra fine mesh sizes.

TIP!

Sprinkle the sieved bran over the pastry before baking and you have the full grain again.

Sieve insert 1
fine mesh
width 0.63 mm
(0.025 in)
(24 mesh)

Sieve insert 2
medium mesh
width 0.80 mm
(0.031 in)
(19 mesh)

Sieve insert 3
coarse mesh
width 1.25 mm
(0.049 in)
(15 mesh)

If it may be even finer, you can get two more inserts in our store: 0.25 mm and 0.50 mm.

	Technical Specifications*	Capacity in g (oz)	Height in mm (in)	Width in mm (in)	Depth in mm (in)	Weight in kg (lb)	Material	Delivery includes	Warranty
	FLOUR SIFTER	400 (14.12)	260 (10.24)	136 (5.36)	136 (5.36)	0,7 (1.54)	Beech plywood, acrylic glass	1 Flour Sifter, lid, 3 screens	3 years

ACCESSORIES

INTERCHANGEABLE MILLING SYSTEM

Use our interchangeable milling system to process grains, spices, coffee and gluten free cereals in a single mill, without cross contamination! Perfect for anyone with food sensitivities. The system consists of an interchangeable milling chamber insert made of silicone, which comes with an additional pair of grinding stones. It is suitable for all KoMo mills delivered after summer 2011. The grinder can be inserted into the mill in just a few simple steps, and is easy to clean after use.

	Technical Specifications*	Weight in g (lb)	Material interchangeable milling	Material millstones	Delivery includes	Warranty
	CHANGE GRINDER	750 - 820 (1.65 - 1.80)	silicone, dishwasher safe	corundum-ceramic	1 interchangeable milling chamber, set of 2 millstones, 1 brush, 1 allen key	3 years

ACCESSORIES

SINGLE CHAMBER GRANARY

Sitting grain is unfortunately an attractive treat for pests. Our granary chambers automatically move all the grains a little every time you release grain, so that no pests can lodge your supplies. Remove just the amount of grain you need via the stainless steel gate - the integrated cup measures up to 2 cups of grain. The clear convex viewing panes show how much grain you have available. Why not hang several cylinders side by side, to accommodate your growing supplies with ease?

Remove the grain cylinder

Grain releases into the measuring cylinder

Remove the grain from the cylinder

ACCESSORIES

THREE CHAMBER GRANARY

Simple to use, easy to maintain and beautifully designed - our THREE CHAMBER GRANARY. To use, simply remove just the amount of grain you want via the stainless steel gate (the integrated cup measures up to 2 cups of grain). The convex viewing panels show how much grain you have at ready access. The storage containers are made of cabinet-grade beech veneer plywood and come with a wall mount.

	Technical Specifications*	Capacity in kg (oz)	Height in mm (in)	Width in mm (in)	Depth in mm (in)	Weight in kg (lb)	Material	Warranty
	EINKAMMER-GETREIDESPEICHER	2,5 (88.18)	642 (25.27)	137 (5.39)	142 (5.59)	1,9 (4.18)	Beech plywood, acrylic glass, stainless steel slide	3 years

ACCESSORIES

FLOUR SIEVES

Flour that's been well sifted stays fresher for longer. Did you know that wholegrain flour - minus the bran - has a sticky quality, making it very useful in the preparation of fine pastry? That's where our sieves come into play: use the fine flour for making delicious pastries, and the bran as a healthy additive for your breakfast cereals or smoothies. Our sieves are available in two sizes: 18 cm diameter (coarse and fine mesh) and 20 cm diameter (fine mesh only).

STONE PINE BOWLS

These beautiful wooden bowls, hand crafted in the Austrian Tyrol are naturally fragrant and available in four sizes: 16, 20, 25 and 30 cm diameter. Stone pine wood is known for its light weight, softness, and naturally high oil content. Highly versatile, our bowls complement the beech wood of our mills, and are ideal for holding grains and flours. The bowls are finished with food safe natural mineral oil.

PEDDIGREE BASKET

Handmade peddigree baskets in long or round version, with linen hood. The advantage of the linen hood: you do not need an extra cloth to cover the dough or simply let the dough rise directly on the linen. This way there is no dough residue between the grooves of the cane baskets afterwards. Our baskets are made of untreated cane and are large enough for 1 kg of bread dough.

ACCESSORIES

CERAMIC BOWLS

Our ceramic bowls are hand finished - and each one is unique! Each bowl has its own special character, but all will collect your freshly ground flour or flakes in a stylish manner. The perfect complement to our mills and flakers. Finished with food-safe glazing.

FLOUR BAG HOLDER

Designed for the FIDIBUS XL, this flour bag holder is very practical. Thanks to the horseshoe shaped wooden clamp, bags can be clamped to the spout, so that the ground material can run into the bag directly, eliminating dust.

STORAGE DRAWER

This beautiful drawer of cabinet-grade beech veneer plywood transforms your FIDIFLOC to a cereal station with practical storage. Simply attach your FIDIFLOC to the drawer and secure in place with the two pins. Store your favorite flakes for your breakfast museli and you have everything in one place! Added bonus: thanks to how the drawer elevates the FIDIFLOC's crank, you no longer need to place it on a table edge to turn the handle.

ACCESSORIES

FreshMaker Care Wax Oil

The perfect care for your Komo products made of oiled beech wood. Wood lives and needs care from time to time to preserve its beautiful appearance. Our care wax oil brings aging equipment back to a high gloss! The FRESHMAKER care set contains a fine abrasive fleece and a cotton cloth. This makes small scratches and dirt caused by use a thing of the past.

Noble baker knife

With this noble baker's knife made of walnut wood, the cutting and decorating is twice as much fun. It nestles in your hands and glides almost by itself through the dough. With the practical clamping screws, you can change the blade at any time in the blink of an eye. Together with the blade guard and the practical little bag, it can also always be stored safely.

Cleaning brush

For easy cleaning of the grinding chamber and the outlet of our grain mills.

ACCESSORIES

Bread bag

Bread bag made of 100% natural linen. This bread bag keeps your bread fresh and juicy for a long time. Since linen can absorb up to up to 35% of its own weight in air humidity and releases it to the bakery products in the bread bag, the bread bag is ideal for keeping fresh and storing bakery products.

KoMo Cutting board

Beautiful wooden cutting board with burned KoMo logo made of PEFC certified wood, sustainable and regional. A MUST for every Komo fan! Optionally also with personal engraving.

KoMo Fabric bag

Show everyone you're a #freshmaker too. With our new, eco-friendly KoMo cloth bag - perfect for buying cereal and, of course, everything else.

We are constantly expanding our range of accessories, so it's best to check back regularly on our homepage at www.komo.bio.

RECIPE - EASY WHOLEMEAL BREAD

This bread succeeds in no time at all. It comes from the highly recommended book „Organic Baking with Children“ by Gudrun Ambros, bio-verlag Schaafheim. Have fun baking it again!

Ingredients:

- 350 g freshly ground spelt flour
- 150 g freshly ground rye flour
- 1 sachet dry yeast
- ½ tsp honey
- 500 ml lukewarm water
- 2 tsp sea salt
- 2 tablespoons apple cider vinegar
- 75 g mixed seeds (sunflower seeds, Sesame seeds, flax seeds, poppy seeds, pumpkin seeds)
- ¼ tsp each ground coriander, cumin and fennel

Preparation:

- Dissolve dry yeast and honey in half of the lukewarm water.
- Allow to swell for about 10 minutes.
- Finely grind spelt and rye in the grain mill.
- Mix the flour with salt, apple cider vinegar, seeds and spices in a bowl.
- Add the yeast mixture and the remaining water and mix to a viscous dough.
- Do not let the dough rest, but immediately place it in a greased and covered with sesame seeds and/or sunflower seeds (according to your taste) in a lined loaf pan.
- Place the bread in a cold oven and bake at 200°C (hot air 180°C) for about 75 minutes.
- Loosen the edge of the bread with a knife from the mold and cool the bread on a cooling rack and let it taste :)

Preparation time: 20 minutes + ca. 75 minutes bake time

Portions: 1 Bread loaf

RECIPE - PORRIDGE

With this breakfast oatmeal (porridge) you start a new day powerful and healthy. Here is the simple and quick recipe.

Ingredients:

- 125 g freshly flaked oatmeal
- 500 ml milk
- 1 pinch salt
- 125 g almonds
- 1 pinch cinnamon
- Fruits of choice

Preparation:

- Heat oatmeal, milk and salt in a saucepan, stirring constantly.
- Simmer gently for 2-3 minutes until a mushy consistency.
- Coarsely chop the almonds and fruit.
- Let porridge cool
- Arrange in a bowl
- Add the almonds and fruit
- Sprinkle with cinnamon and taste :)

Preparation time: 20 minutes total time

Portions: 4 portions

TIPPI!
